

Amendments to the Drawings:

The attached Replacement Sheet of drawings includes changes to Fig. 5. This Replacement Sheet replaces the original sheet which depicted Fig. 5. In Fig. 5, the elements identified in the original drawing by "6" and "7" respectively, are renumbered as elements "8" and "9" respectively, as shown in the Annotated Sheet showing changes which is attached hereto.

Attachment: Replacement sheet and annotated sheet showing changes.

Remarks:

The amendment to page 1 sets forth the international application information.

The amendments on each of pages 42, 44, 49 and 51 are, in each instance, the obvious correction of an obvious error which is immediately apparent when referring to the drawing (Figure) which is discussed in each of the amended portions of the specification.

The error in the drawings is obvious when comparing the lower portion of the REACTOR 1 in original Fig. 5 with the same apparatus which appears in each of Figs. 1, 4 and 6.

Original claim 27 which was an improper multiple dependent claim is amended to become a proper multiple dependent claim. New claim 28 is directed to the subject matter which was removed from claim 27 by the present amendment.

It is respectfully submitted that all of the amendments are supported by the original specification and drawings. Entry is solicited.
